### TECHNICAL SKILLS

**Frontend:** React, Next.js, Svelte, Electron.js, HTML5, CSS3, Tailwind, ShadCN, Framer Motion, Flutter.

**Backend:** Node.js, Express, Python, Sanic, Django, Flask, FastAPI, WebSockets, Rest API, Redux.

**Databases:** PostgreSQL, MongoDB, MySQL, SQLite, Supabase, Firebase, Appwrite

**AI/ML:** Whisper AI, Gemini API, Moondream, OpenCV, Ollama.

**Tools:** Git, Docker, Postman, CI/CD, Linux, AWS

### EDUCATION

MASTER OF COMPUTER APPLICATIONS (MCA) -  
MIT WPU, PUNE (2025)  
**GPA:** 8.17

BACHELOR OF INFORMATION TECHNOLOGY -  
UNIVERSITY OF MUMBAI (2023)  
**GPA:** 9.08

### PROFESSIONAL PROFILE

I am a Software Developer with hands-on experience in creating scalable applications using modern technologies, including React and Node.js. My focus on building user-friendly interfaces and backend performance allows me to deliver effective solutions. I have a strong understanding of AI integration, and I am skilled at collaborating with cross-functional teams to meet project objectives.

### PROFESSIONAL EXPERIENCE

#### JR. FULL-STACK DEVELOPER

Perception & Quants Research pvt ltd | Remote

02/2026 - current

- Managing and developing responsive web and desktop applications with a focus on performance and cross-platform compatibility.
- Collaborated with designers and stakeholders to translate requirements into user-centric features.
- Enhanced their existing systems and optimized application performance, resulting in **20% faster load times** and improved reliability.

#### SOFTWARE DEVELOPER

Proxie studio pvt ltd | Remote

02/2024 - 05/2025

- Developed responsive web and desktop applications with a focus on performance and cross-platform compatibility.
- Collaborated with designers and stakeholders to translate requirements into user-centric features.
- Integrated REST APIs and optimized application performance, resulting in **25% faster load times** and improved reliability.
- Key Contribution:** Engineered a Website Builder Prototype (Bufferleaf.co) for a Swedish MNC, implementing drag-and-drop functionality using Next.js and Redux, reducing page-creation time by **40%**.

### PROJECTS

**Volvo Anomalies Detection Dashboard** | Svelte, ShadCN, Supabase, PostgreSQL, WebSockets

- Built a real-time dashboard for camera-based anomaly detection.
- Enabled secure authentication and cloud storage using Supabase
- Integrated WebSocket connections for live camera data.
- Enhanced UX using Framer Motion animations.

**Whisper AI Real-Time Transcription** | React, Electron, Supabase, Hugging Face

- Designed a desktop application for real-time speech-to-text transcription with **4-5 second latency**.
- Integrated Whisper AI to transcribe meetings within seconds.
- Programmed Google OAuth 2.0 authentication.
- Packaged the application using Electron for cross-platform use.

**Make My Cover Letter** | Next.js, Supabase, Stripe, Gemini API

- Built an AI-powered platform to generate personalized cover letters in **under 10 seconds**
- Integrated Gemini API for resume analysis and content generation.
- Implemented Stripe payments and subscription management.
